

Exercise1: Match the 7 life processes (MRS GREN), To their definitions by drawing a line.

Movement	This is when organisms get **bigger** or become more complex as they get older.
Respiration	This is the process of obtaining **food**. Animals consume (eat) other living things to get food. Plants make their own food by photosynthesis.
Sensitivity	This is the process of organisms **changing their position** in their environment.
Growth	This is the process that enables organisms to transform food into **energy** that their cells can use.
Reproduction	This is the process of organisms **detecting and responding** to changes in their environment.
Excretion	This is the process of organisms passing on their genes to their **offspring**.
Nutrition	This is the process of organisms removing any **waste** products from inside them.

2-I think I am a living thing because:

_____.

_____.

_____.

LIVEWORKSHEETS

Use the following classification keys to place the animals in their correct boxes by dragging their names and dropping them where they belong.

Spotted fritillary

Hammerhead

Grey Wolf

Adonis blue butterfly

Shark

Robin

Macaque

Can it fly?

Yes

No

Does it have feathers?

Does it live in trees?

Yes

No

Yes

No

Does it have spots on its wings?

Does it live in water?

Yes

No

Yes

No
