

TEMA 9:

LONGITUD, CAPACIDAD Y MASA

LONGITUD Diagram showing the conversion of length units: km, hm, dam, m, dm, cm, mm. Multiplication by 10 moves up the ladder, and division by 10 moves down.	Km = Kilómetros hm = Hectómetros dam = Decámetros m = metros dm = decímetros cm = centímetros mm = milímetros
CAPACIDAD Diagram showing the conversion of capacity units: Kl, hl, dal, l, dl, cl, ml. Multiplication by 10 moves up the ladder, and division by 10 moves down.	Kl = Kilolitros hl = Hectolitros dal = Decalitros l = litros dl = decilitros cl = centilitros ml = mililitros
MASA Diagram showing the conversion of mass units: Kg, hg, dag, g, dg, cg, mg. Multiplication by 10 moves up the ladder, and division by 10 moves down.	Kg = Kilogramos hg = Hectogramos dag = Decagramos g = gramos dg = decigramos cg = centigramos mg = miligramos
