Computer Science

Grade 10

1. Identify the problem

- *Match the cause with the correct solution:*

Probable causes
The power cord is faulty.
The power supply switch is not turned on.
The CPU has overheated.
The CPU fan is failing.
The video cable is loose or damaged.

Possible solutions
Reinstall the CPU.
Reconnect or replace the video cable.
Use a known good power cord.
Turn on the power supply switch.
Replace the CPU fan.
