

Enzymes Review Worksheet

This worksheet will be due at the beginning of class on the day of the test.

**1. a) Fill in the gaps in the following sentences using the words in the box below.**

- i) Enzymes are biological that speed up chemical reactions in living organisms.
- ii) Enzymes are protein molecules, which are made up of long chains of
- iii) The sequence and type of amino acids are in each protein, so they produce enzymes with many different shapes and functions.
- iv) The shape of an enzyme is very important to its

different	catalysts	function	the same	amino acids
-----------	-----------	----------	----------	-------------

b) Label the image below with the following terms: active site, substrate, enzyme.

1. a) Enzymes and their substrates are often compared to a lock and key. This is called the Lock and Key Model. Label the lock and key in the image above.

2. b) Explain what would happen if a substrate molecule with a different shape to the enzyme came into contact with the enzyme's active site.
