

QUIZ #2 – SCIENCE 3

A. Identify the following:

- _____ 1.) Are the hairs at the edge of our eyelids. They stop sweat, dust, and dirt from entering our eyes.
- _____ 2.) Are covers that open and close.
- _____ 3.) Thick, short hairs above our eyes. They protect eyes from dirt and sweat.
- _____ 4.) Bulging, transparent covering of the sclera.
- _____ 5.) Is the tough, outer covering that forms the “whites” of our eyes.
- _____ 6.) Colored circle in our eyes. It may be black, brown, gray, green or blue.
- _____ 7.) Dark spot at the center of the iris.
- _____ 8.) Clear part of our eyes behind the pupil.
- _____ 9.) Is the part of your eye behind the retina. It sends message to a big nerve and travels to our brain then our brain understands those messages.
- _____ 10.) Is the lining at the back of your eyeball where images are formed.

Iris

Pupil

Lens

Sclera

Retina

Eyelids

Eyelashes

Cornea

Optic Nerve

Eyebrows
