

THE EAR

1. Drag and label the parts of the ear

small bones - pinna - ear canal - auditory nerve - cochlea - eardrum

2. Choose the correct word.

- The *pinna* / *cochlea* captures the sound.
- The cochlea sends the sound through the *ear canal* / *auditory nerve* to the brain.
- The brain *interprets* / *vibrates* the information.
- The sound travels through *the ear canal* / *pinna*.
- The sound makes the *eardrum* / *small bones* vibrate.
- The *ear canal* / *cochlea* captures the sound vibrations.
