Mother Nature

Discuss:

- Do you like spending time in nature? Why / Why not?
- What do you think are the most important environmental issues our planet is facing today?
- Read the expressions including the word 'nature' in bold. Can you guess what they mean?

- My parents are thinking about moving away from the city and **going back to nature**.
- Anang has lived all his life by the sea, so fishing **comes as second nature** to him.
- **It's only human nature** to be worried about environmental problems.
- Juanda is a calm and relaxed person, so getting into arguments isn't **in his nature**.
- As a doctor, Dewi deals with a lot of people, so it helps that she's a **good-natured person**.
- The sailing boat was lost in the middle of the sea during the storm and left to feel **the forces of nature**.
- They were drinking lots of water because it was hot, but this meant they had to stop the car to **answer the call of nature** several times on the journey.

Value(s)

- Respecting nature
- Protecting the environment

Go through the module and find...

- a radio programme about a country in South-east Asia
- a letter focusing on an environmental problem
- a description of a place in China
- three environmentally-friendly products
- three texts about interesting animal characteristics
- a quiz about the environment

In this module you will...

- talk about nature and environmental problems
- learn to group animals using collective nouns
- learn to express surprise, alarm and joy
- learn to write an article describing a place
- learn to express criticism, possibility, certainty and absence of necessity in the past
- learn to brainstorm ideas using a mind map
- learn to write a letter (to the editor) expressing your opinion

A. Discuss.

- Are there any animals that you would consider intelligent? Why?
- What characteristics make humans different from animals?

B. Look at the titles and the pictures. What do you think the text is about?

Amazing animals!

You might think that what makes us different from animals is our ability to think and to build friendships with others, but in fact animals are capable of more extraordinary things than you might imagine. Find out why...

Big love

In many cultures, elephants are seen as a symbol of wisdom and are known for having an excellent memory. They have the largest brains of all land animals and their intelligence is evident in their ability to learn, use tools and even in their sense of humour. They are very social animals and although they live in herds, they spend their lives in pairs devoted to a best friend. These friendships between elephants are well-known, but in an elephant sanctuary in the United States, an unusual friendship blossomed.

Tarra, an Asian elephant, chose Bella, a dog, as her best friend. The odd pair loved spending all their time together, eating, sleeping and playing. Then one day, Bella had an accident. For the entire three weeks it took her to recover, Tarra waited outside the sanctuary office. She was free to wander the 2200 acres but she was loyal to her friend and chose to wait for her to get better. It just shows us how animals don't consider differences when they choose their friends.

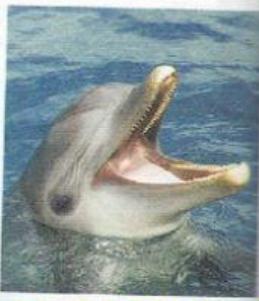

Clever crows

We use the word 'birdbrain' for people who aren't very clever, but just because birds have small brains it doesn't necessarily mean they aren't intelligent, especially crows. Some crows make tools for finding food. They think about what tool they need and look for it. If they cannot find the right shape, they make the tool themselves by cutting bits of wood from trees, leaves or grass. They even store their tools in a safe place to use at a later time. Another thing they hide is food. This is common among many animals, but if a crow thinks another crow from the flock is watching, it will pretend to store food in one place, then put it somewhere else. Crows in Japan are clever enough to leave nuts on the road at traffic lights so that cars will run over them and crack them open. And amazingly, crows have been filmed using food scraps for fish bait. They drop the scraps into the sea to attract fish and catch them. Pretty smart thinking for such a small brain!

Dolphin to the rescue!

Dolphins are well-known for their intelligence and their ability to understand human language. However, many people do not realise how well they communicate with other animals with which they share the oceans. In 2008, two whales, a mother and her calf, ended up getting stuck in shallow waters off the coast of New Zealand. A group of people gathered at once wanting to help. They spent hours trying to direct the whales back into deeper waters. Both the rescuers and whales were exhausted and after some time the authorities were at a loss. They didn't know what to do next and in the end, they decided to give up. They were considering putting the animals down, when a dolphin turned up. Somehow, it calmed the whales down and communicated with them. Within a few minutes the whales were following the dolphin back to the freedom of safe waters. The dolphin had saved their lives and had accomplished something that humans had not been able to. It reminds us that even though we might not understand what animals are saying, other animals probably do!

C. Read the text again and write E for Elephant, C for Crow or D for Dolphin.

Which animal...

1. uses its knowledge to help other species?	<input type="radio"/>	5. has been known to succeed where people can't?	<input type="radio"/>
2. doesn't care about species when building a relationship?	<input type="radio"/>	6. has developed the ability to plan for future events?	<input type="radio"/>
3. sometimes plays tricks on other members of the same species?	<input type="radio"/>	7. shows unusual levels of loyalty?	<input type="radio"/>
4. is intelligent despite the size of its brain?	<input type="radio"/>	8. uses humans to accomplish a task?	<input type="radio"/>

D. Match the highlighted words/phrases in the text with their meanings.

There are two extra meanings which you do not need to use.

1. devoted	<input type="radio"/>	a. drive over something
2. odd	<input type="radio"/>	b. understand what's happening
3. recover	<input type="radio"/>	c. not deep
4. run over	<input type="radio"/>	d. strange, unusual
5. shallow	<input type="radio"/>	e. come together to form a group
6. gather	<input type="radio"/>	f. succeed in doing something
7. accomplish	<input type="radio"/>	g. get well after an illness or injury
		h. relax
		i. having great love for somebody and being loyal to them

E. Discuss.

- Do you know of any other amazing facts about animals?
- Do you know of any other stories similar to these?

Grammar

To-infinitive / Infinitive without to

- I've decided to **get** a new goldfish. Do you want to **come** to the pet shop with me?
- Remind me to **go** to the supermarket to **buy** some milk, will you?
- Edna doesn't know which **hat** to **wear**.
- We should all **do** something to **save** endangered species.
- It's too hot to **go** out for a walk right now.
- Will you help me (to) **clean** out the rabbit cage?

-ing form (gerund)

- **Working** at a zoo can be a very tiring job.
- Will you stop **talking** with your mouth full? It's disgusting.
- How about **grabbing** a bite to eat later?
- My parents are thinking of **buying** a house by the seaside.

Complete with the correct form of the verbs in brackets.

1. Roger was very happy _____ (see) his friends after the holidays.
2. My brother's angry at me. I promised _____ (help) him with a project, but in the end I couldn't make it and I forgot _____ (call) home _____ (say) I'd be late.
3. I don't mind _____ (stay) alone at home during the day, but I can't stand _____ (be) alone in the house at night.
4. What would you like me _____ (do) after I have finished _____ (feed) the animals?
5. There's no point in _____ (run) for the bus. It has already left.
6. Fay thinks she must _____ (lose) some weight so she's considering _____ (go) on a diet.
7. The authorities made all the people _____ (leave) the scene of the accident.
