a. smile

b. urinate

c. breathe

13. A baby can respond to _____.

a. laughter

b. stimuli

c. cry

14. We choose materials depending on the _____.

a. product

b. science

c. properties

15. The ability of a material to support heavy object is the _____.

a. strength

b. buoyancy

c. hands

16. _____ is the ability of a material to float.

a. strength

b. buoyancy

c. metal

17. _____ is the ability of a material to bend easily.

a. strong

b. strength

c. flexibility

18. Most metals are _____.

a. soft

b. strong and hard

c. hard and wind

19. Steel is used to make _____.

a. bed

b. knives

c. phones

20. The strongest type of metal is _____.
a. iron b. wood c. silver
21. Most metals can't _____ on water because they are _____.
a. light/fly b. float/heavy c. fly/fly
22. _____ materials can float on water.
a. iron b. wood c. knife
23. _____ comes from trees.
a. metals b. iron c. wood
24. Woods are used to make _____.
a. boat b. telephone c. gold
25. Our books are made out of _____ materials.
a. rubber b. rafts c. wood
26. What object is similar but made from different types of materials?
a. book b. cup c. pen
27. _____ material is the strongest.
a. wood b. plastic c. metal
28. Absorbent material is the ability of a material to _____ up water.
a. soak b. drink c. dry
29. _____ can soak (absorb) more water than a tissue paper.
a. shoe b. cotton c. paper
30. Which object can't absorb (soak) water?
a. diapers b. cotton c. glass cup
