

Vārds: _____

Vektoru koordinātes!

1. Nosaki dotajiem vektoriem koordinātes!

Atbilde raksti (x; y)

$$\overrightarrow{AB} = (\quad ; \quad)$$

$$\overrightarrow{KL} = (\quad ; \quad)$$

$$\overrightarrow{CD} = (\quad ; \quad)$$

$$\overrightarrow{MN} = (\quad ; \quad)$$

$$\overrightarrow{EF} = (\quad ; \quad)$$

$$\overrightarrow{OP} = (\quad ; \quad)$$

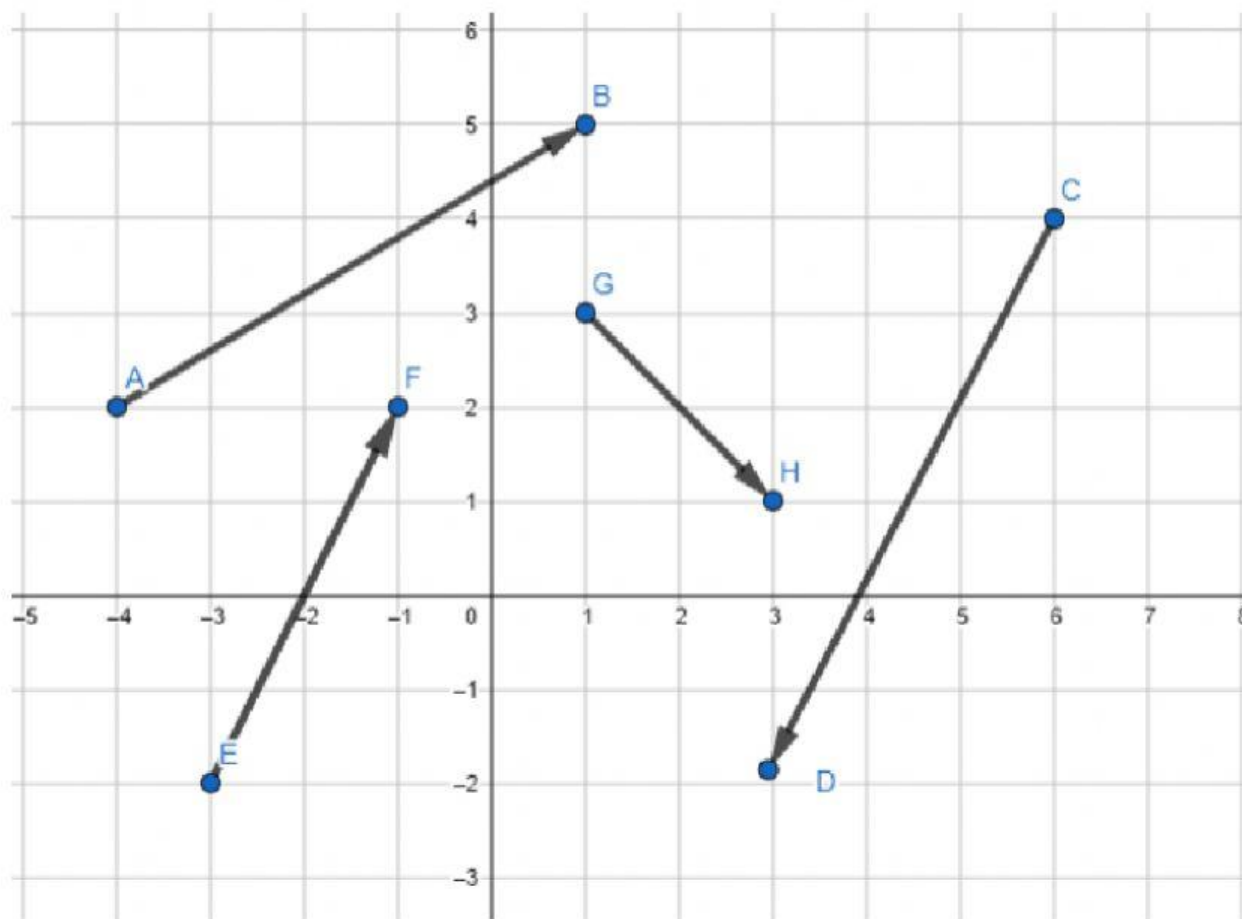

$$\overrightarrow{GH} = (\quad ; \quad)$$

$$\overrightarrow{QR} = (\quad ; \quad)$$

$$\overrightarrow{IJ} = (\quad ; \quad)$$

$$\overrightarrow{ST} = (\quad ; \quad)$$

2. Aprēķini vektora garumu! Aprēķinos vari izmantot kalkulatoru.
(Atbilde noapaļo līdz desmitdaļām)

$$|\overrightarrow{AB}| = \sqrt{\quad + \quad} = \sqrt{\quad} =$$

$$|\overrightarrow{CD}| = \sqrt{\quad + \quad} = \sqrt{\quad} =$$

$$|\overrightarrow{EF}| = \sqrt{\quad + \quad} = \sqrt{\quad} =$$

$$|\overrightarrow{GH}| = \sqrt{\quad + \quad} = \sqrt{\quad} =$$
