

CELLS

1 Animal and plant cells have similarities and differences. Label each name into the correct place.

Cytoplasm

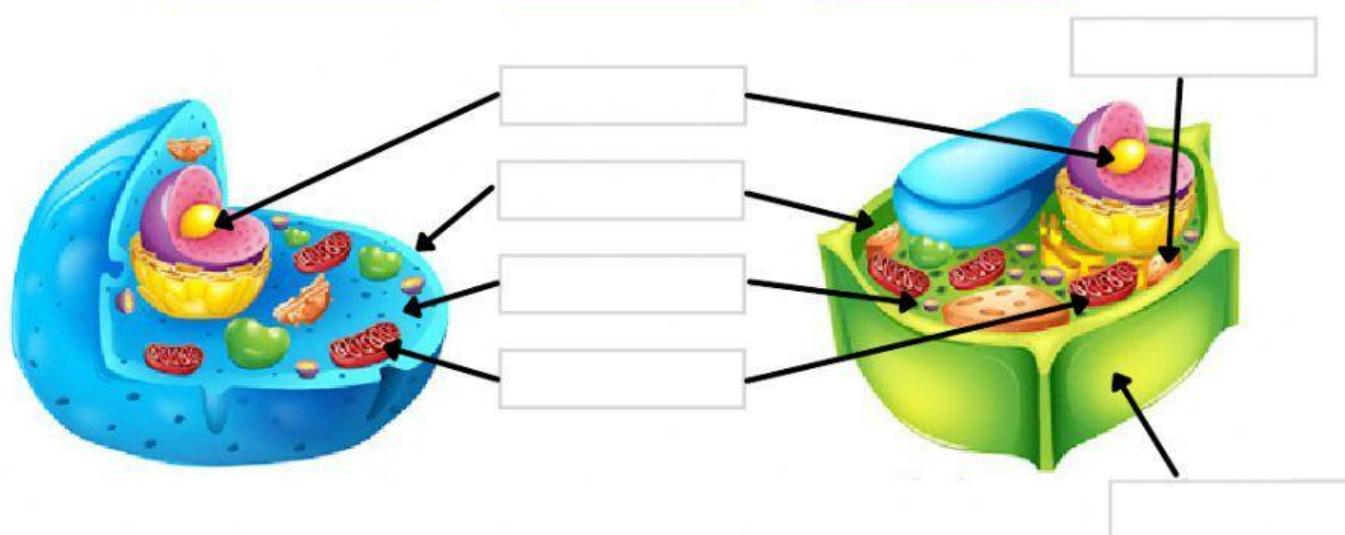

Cell wall

Nucleus

Vacuoles

Chloroplasts

Cell membrane

2 Each part of the cells perform a function. Join each part with the correct function.

Nucleus

Protect the cell and give the cell its shape.

Cell membrane

Contain water and minerals and storage information.

Cytoplasm

Contain all the components of the cell.

Vacuoles

Contain the chlorophyll to make the photosynthesis.

Cell wall

Control all the functions of the cell.

Chloroplasts

Control the exchange of substances.
