

Topic : Space (6.3 Perimeter and area)

Instructions: Watch the video first then Find the perimeter of the polygons below.

Perimeter segi empat tepat
 $= 18 \text{ m} + 10 \text{ m} + 18 \text{ m} + 10 \text{ m}$
 $= 56 \text{ m}$

Perimeter oktagon sekata
 $= 8 \times 6 \text{ m}$
 $= 48 \text{ m}$

Find the perimeter of the polygons below

1  $7 \text{ cm} + \boxed{} \text{ cm} + 7 \text{ cm} + \boxed{} \text{ cm}$ $= \boxed{} \text{ cm}$	2  $4 \text{ cm} \times \boxed{}$ $= \boxed{} \text{ cm}$
3  $7 \text{ m} + \boxed{} \text{ m} + \boxed{} \text{ m}$ $= \boxed{} \text{ m}$	4  $16 \text{ m} + \boxed{} \text{ m} + \boxed{} \text{ m}$ $= \boxed{} \text{ m}$
