

## ADICIÓN Y SUSTRACCIÓN DE MONOMIOS SEMEJANTES

$$15a^3b + 45a^3b = \blacktriangleright \begin{array}{cccc} & & \square & \\ \square & \square & & \square \end{array}$$

$$51m^6n - 15m^6n = \blacktriangleright \begin{array}{cccc} & & \square & \\ \square & \square & & \square \end{array}$$

$$-23c^5d^5 + 10c^5d^5 = \blacktriangleright \begin{array}{ccccc} & & \square & & \square \\ \square & \square & & \square & \square \end{array}$$

$$9x^7y^2 + 22x^7y^2 = \blacktriangleright \begin{array}{ccccc} & & \square & & \square \\ \square & \square & & \square & \square \end{array}$$

# MULTIPLICACIÓN Y DIVISIÓN DE MONOMIOS.

$$9xy \cdot 2x^2y^2 = \longrightarrow \begin{array}{ccccc} & & \square & & \square \\ \square & \square & & \square & \square \\ & & & & \square \end{array}$$

$$\frac{30a^8b^6}{10a^4b^3} = \longrightarrow \begin{array}{ccccc} & & \square & & \square \\ \square & \square & & \square & \square \\ & & & & \square \end{array}$$

$$\frac{-81mn^3}{3mn^2} = \longrightarrow \begin{array}{cc} \square & \square \end{array}$$

$$8p^3q^2 \cdot (-5p^4q^3) = \longrightarrow \begin{array}{ccccc} & & \square & & \square \\ \square & \square & & \square & \square \\ & & & & \square \end{array}$$
