Triangles Quiz

Draw a line to match the triangle name to its description/definition.

Isosceles Triangle	has one 90 degrees angle
Right Triangle	has three equal sides
Equilateral Triangle	has one angle that is more than 90 degrees and less than 180 degrees
Obtuse Triangle	has three angles less than 90 degrees
Scalene Triangle	has two equal sides
Acute Triangle	has no equal sides

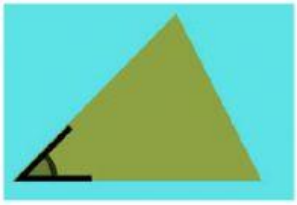

Identify the triangle. Write the name of the triangle under each picture. Use the information above to guide you.

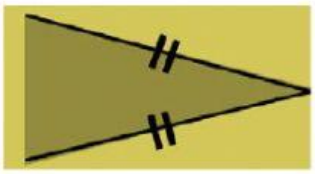

LIVEWORKSHEETS

Use your protractor to draw the following triangles (by angle). You will do this in your notebook and submit a picture of it on the platform.

1. Draw a triangle with a 65 degrees angle.

2. Draw a triangle with a 120 degrees angle.

3. Draw a triangle with a 90 degrees angle.
