Unit2: Amazing jobs – Reading

Practice (1)

❖ Read and fill in the gaps with the following vocabulary:

Jimmy Chin is an American climber, photographer, and Academy Award winning film director.
You are more likely to find Jimmy commuting to Mount Everest than to an office. He organized many dangerous climbing trips to China, Pakistan, Nepal, Greenland and more. He takes photographs and videos in some of the most amazing – but dangerous- places on Earth. His achievements include climbing and photographing the world's highest mountains in Nepal, Tibet and Pakistan. Why does Jimmy do such difficult work in such extreme places? He replies, 'Creating films and photographs in situations that few other could experience is my life's inspiration.'

Kevin Hand is another example of explorers working in extreme places. Kevin is a planetary scientist.. He drills through the ice in northern Alaska and the Arctic Ocean to study microscopic life in the water underneath it.
'I hope that studying microscopic life under ice on Earth will help me to find and study life under the ice on Jupiter's moon, Europa' he says.
He also works with directors as a scientist advisor for films, such as Europa Report. Kevin has even been in a film. He was a featured scientist in the film 'Aliens of the Deep'.
Jimmy and Kevin set examples that jobs don't have to be boring!

Create	Advisor	Commutes	Photographer	Scientist	dangerous

1) Jimmy Chin works as a ..... and..... to mount Everest.

2) Jimmy organizes ..... climbing trips in China, Nepal and Pakistan

3) Jimmy loves taking extreme photos to..... films.

4) Kevin Hand works as a..... in Alaska.

5) Kevin worked in Aliens of the deep film as an.....
