

Quiz on Ionic Bonding

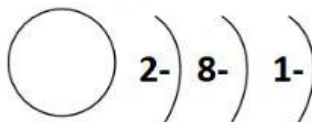

Fill in all the blanks and complet the nucleus of the Bohr Models

For the elements that **lose electrons**, drag the eletrons that are lost into the trash. For the elements that would **gain electrons**, drag the correct number gained on to the right energy level.

1) Family one

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

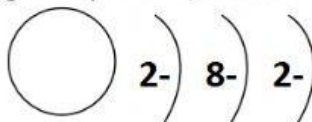

Na 11+ protons, 12 neutrons, 11- electrons

2) Family two

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

Mg 12+ protons, 12 neutrons, 12- electrons

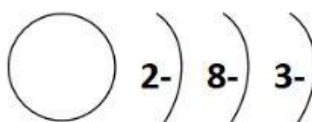

Put the electrons lost in the trash

3) Family three

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

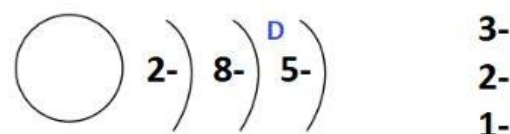

Al 13+ protons, 14 neutrons, 13- electrons

4) Family Five

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

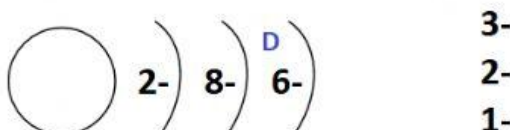

P 15+ protons, 16 neutrons, 15- electrons

5) Family six

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

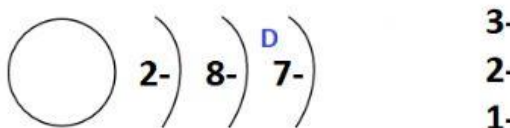

S 16+ protons, 16 neutrons, 16- electrons

6) Family seven

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

Cl 17+ protons, 18 neutrons, 17- electrons

7) Family eight - noble gases

- Valence electrons _____
- Oxidation number _____
- Gain or lose electrons _____
- How many electrons are left on the outer ring _____

Ar 18+ protons, 22 neutrons, 18- electrons
