

## Active Transport

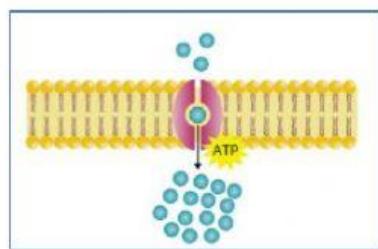

### A. Select the correct option

1. Active transport is the movement of molecules from an area of \_\_\_\_\_ concentration to an area of \_\_\_\_\_ concentration.
2. Active transport moves materials \_\_\_\_\_ the concentration gradient.
3. Active transport \_\_\_\_\_ energy.

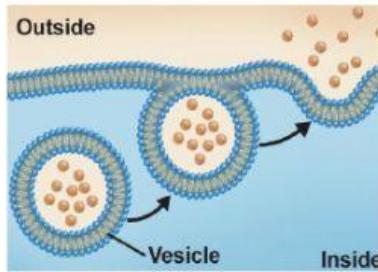

### B. Match the type of transport shown in the image:

a. Exocytosis

b. Carrier-assisted transport

c. Endocytosis

d. Facilitated Diffusion
