Vamos dividir!

$$\begin{array}{r} \text{D} \quad \text{U} \quad \text{U} \\ 24 \overline{) 3} \end{array}$$

x

Below the division bar, there are three empty boxes for the quotient:

Below the first two boxes, there are two more empty boxes:

A blue curved arrow points from the first two boxes of the quotient to the right, indicating the next step in the division process.

Vamos dividir!

D U

$$\begin{array}{r} 24 \overline{) 4} \\ \underline{00} \\ 00 \end{array}$$

The diagram illustrates a division problem. The dividend is 244, and the divisor is 4. A yellow L-shaped bracket is drawn under the 24, with a red 'x' at the end, indicating that 4 does not divide 24. Below the 24, there are two empty boxes for the quotient. A yellow arrow points from the 4 in the dividend to the 4 in the divisor, indicating the division operation.

Vamos dividir!

$$\begin{array}{r} \text{D} \quad \text{U} \\ - 35 \overline{) 5} \quad \times \\ \hline \square \quad \square \quad \square \\ \hline \square \quad \square \end{array}$$

A diagram illustrating a division problem. The dividend is 5, and the divisor is 35. The quotient is represented by three empty boxes. A red 'x' is placed next to the dividend. A yellow arrow points from the dividend to the quotient boxes.
