**Write the Notes in your Notebook or Exercise Book**

**HFLE**

**Pollution**

**When harmful materials go into the environment we call this pollution. Pollution is caused by many different human activities. It affects our land, air and water.**

## Pollution can make us ill or sick:

- Air pollution causes asthma and other breathing problems.
- Water pollution causes stomach illnesses such as diarrhea.
- Land pollution, such as throwing garbage in gullies, spreads disease.

Smoking pollutes the air and causes illnesses for the smoker and those around.
