4. If you can't reuse or recycle a plastic, it is thrown away *(throw away)* in the trash.
5. Trash is reduced *(reduce)* by recycling more things.
6. Some trash is reused *(reuse)* for other things.
7. The environment is made *(make)* more beautiful.
8. Some materials are recycled *(recycle)*.

2

Complete the paragraph. Use the words below.

grow make recycle use wash

We use too many man-made materials. Natural materials must be used more often. They are renewable and often are grown on farms. For example, clothing is made from cotton. Cotton is strong, and it feels good to wear. When it gets dirty, it is washed. When it is too old, it is recycled. It is a useful and practical natural material!
