- Amphibians live under water ☐ and bumps on their bodies.

2. Read and answer the questions.

There are many types of frogs and toads. The biggest frogs are called Goliath frogs. They are as big as your school bag! The smallest frog, the Gold frog, is the size of your fingernail.

Some frogs can jump very far. There is one species which can jump the length of a football field!

Many frogs and toads can change the colour of their skin to camouflage themselves. But the champion is the Fire-bellied toad. When it wants to hide, it is the colour of the plants and stones around it. When it is attacked, its belly changes colour to red and black!

1. Which is the biggest frog?

The biggest frog is

2. Which is the smallest frog?

The smallest frog is
