

## Practico la PROPIEDAD ASOCIATIVA

|                                                                                                                                         |                                                                                                                                           |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|
| $3 \times (6 \times 5) = (\square \times \square) \times \square$ $\square \times \square = \square \times \square$ $\square = \square$ | $12 \times (10 \times 4) = (\square \times \square) \times \square$ $\square \times \square = \square \times \square$ $\square = \square$ |
|-----------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------|

•  $(3 + 7) + 6 = 3 + (\square + \square)$

$\square + \square = \square + \square$

$\square = \square$

•  $(6 + 8) + 5 = \square + (\square + \square)$

$\square + \square = \square + \square$

$\square = \square$

•  $(4 + 8) + 9 = 4 + (\square + \square)$

$\square + \square = \square + \square$

$\square = \square$

•  $(7 + 9) + 2 = \square + (\square + \square)$

$\square + \square = \square + \square$

$\square = \square$

$(2 \times 4) \times 5 = 2 \times (\square \times \square)$

$\square \times \square = \square \times \square$

$\square = \square$

$(3 \times 2) \times 9 = \square \times (\square \times \square)$

$\square \times \square = \square \times \square$

$\square = \square$

$2 \times (5 \times 6) = (\square \times \square) \times \square$

$\square \times \square = \square \times \square$

$\square = \square$

$8 \times (5 \times 3) = (\square \times \square) \times \square$

$\square \times \square = \square \times \square$

$\square = \square$
