Topic 6 Getting around

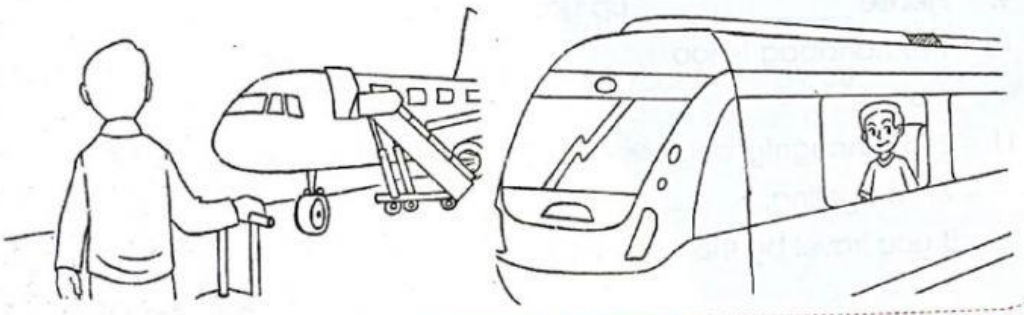

A Read and understand

There are too many cars on our roads nowadays. If you just come across a busy road, you can see so many number of cars. And more surprising is that come you can see only one driver per car. This is why traffic jams occur.

One way to reduce traffic jams is encouraging more people to use public transportation. Travelling by public transport not only benefits the users but the whole community. Travelling by public transport helps us to save money. You do not have to pay for parking, fuel or toll charges. All you have to do is pay for the transport fare which is very much lesser than the other expenses.

Today most public transports are very comfortable and relaxing. If you get a seat, you can be on your phone or even close your eyes and just 'doze off' for a while. But if you are driving or even sitting at the passenger seat, you can hardly do these. You all be more concentrating on the road to avoid accidents from happening.

Finally, by reducing less vehicles on the road means we are helping to reduce pollution. So let us keep our cars, motorcycles or vans at home and travel in the wonderful LRTs, MRTs, the commuters and the luxurious buses and coaches.
