Write the Notes in your Notebook or Exercise Book

HFLE

Put It in the Bin!

What do we do with our garbage at school?

What do we do with our garbage at home?

We put it in the bin!

Rats, mice, flies and mosquitoes spread diseases.

Garbage and litter attract rats, mice, cockroaches and flies. They feed on the garbage. Pools of water attract mosquitoes and other insects.

Some of the diseases we can get by an unclean environment includes: Dengue Fever, Malaria, Zika Virus, Rabies and Leptospirosis.

A clean environment is a healthy environment.
