

MATHEMATICS

TAJUK 7 : COORDINAT, RATIO AND PROPORTION

7.2 Nisbah/Ratio

7.3 Kadaran/Proportion

Volume of Liquid

SOLVING THE FOLLOWING

RATIO

The picture shows a flower vase. Specify ratio:

- The number of roses to the number of tulips
- Number of roses to the number of sunflowers

answers 1 a) = :

answers 1 b) = :

2 J The table shows The length of three wires.

Dawai	R	S	T
Panjang	1 mm	1 cm	1 m

Specify ratio

- Length of wire R to length of wire S
- Length of wire S to length of wire T

answers 2 a) = :

answers 2 b) = :

3

1 ml

100 ml

1 l

Specify ratio :

- Volume of a syringe 1 ml to a syringe volume of 100 ml
- Volume of a syringe 1 ml to the volume of a liquid bag 1 l

answers a) = :

answers b) = :

PROPORTION

1

My sister bought 4 m rubber mat.
Total price is RM32

- a) How much does 6 m of the same rubber mat cost?
b) How long is the rubber mat at a total price of RM96

answer

$$\begin{array}{lcl} \text{a) =} & 4 \text{ m} \rightarrow & \text{RM } 32 \\ & 6 \text{ m} \rightarrow & \frac{\text{RM } 32}{4} \times \boxed{} = \text{RM } \boxed{} \end{array}$$

answer

$$\begin{array}{lcl} \text{b) =} & \text{RM } 32 \rightarrow & 4 \text{ m} \\ & \text{RM } 96 \rightarrow & \frac{\text{RM } 96}{\text{RM } 32} \times \boxed{} \text{ m} = \boxed{} \text{ m} \end{array}$$

2

boxes with a
180 g

- a) What is the mass of 5 boxes of the same cereal?
b) What is the number of boxes for the total mass of 300 g?

answer

$$\begin{array}{lcl} \text{a) =} & 6 \text{ kotak} \rightarrow & 180 \text{ g} \\ & 5 \text{ kotak} \rightarrow & \frac{180}{6} \times \boxed{} = \boxed{} \text{ g} \end{array}$$

answer

$$\begin{array}{lcl} \text{b) =} & 180 \text{ g} \rightarrow & 6 \text{ kotak} \\ & 300 \text{ g} \rightarrow & \frac{300}{180} \times \boxed{} = \boxed{} \text{ kotak} \end{array}$$
