ELECTROMAGNETISM (I)

1. **About gravitational force and electric force, it is true that:**

   - Gravitational force is much bigger than electric force.
   - Electric force is much bigger than gravitational force.
   - Electric force and gravitational force are similar.

2. **"Gravitational force is 10^4 times smaller than electric force."**
   - True
   - False

3. **Which force does appear when electric charges are running?**
   - A contact force
   - Magnetic force
   - Electric force
   - Gravitational force

4. **"Different poles of two magnets attract each other."**
   - True
   - False

5. **"Magnets have a magnetic behaviour because their electric charges are spinning."**
   - True
   - False
