

## An Interview with a Food Expert

**Journalist:** Thank you so much for accepting this interview. I'm a big fan of your cooking show. Could you share with us how you came up with such great idea for the show? It's great to learn how our ancestors used to cook!

**Expert:** Well, I have always been worried about how fast food restaurants are becoming more popular everyday. I wanted to show people that you don't need to cook all your meals in a microwave. There are a lot of other options!

**Journalist:** That's great. Do you think people used to eat more healthily back then?

**Expert:** Oh, definitely! They used fresh ingredients, not canned food as we do today. The food was rich in vitamins and had no chemicals at all.

**Journalist:** Which food groups were consumed the most?

**Expert:** Mostly meat, fruits and vegetables.

**Journalist:** Would you say that eating like our ancestors could reduce the obesity problem our world faces?

**Expert:** It could definitely help!
