

WORKSHEET – ANIMALS AND THEIR HABITATS

1. Drag and drop the names with the correct pictures:

octopus

Andean puma

red howler monkey

dolphin

sloth

alpaca

toucan

Andean cat

Andean condor

jaguar

2. Read the text correctly.

An animal's home is called "habitat". Animals have food and protection in their habitats. The ocean, the Amazon rainforest and the Andes mountains are the habitats of some animals. For example:

The Andean condor lives in the Andes Mountains. It can fly very high. The Andean cat lives in the Andes mountains, too. It can run very fast. Animals are amazing! They can do great things!

The sloth lives in the Amazon rainforest. It moves very slowly. The red howler monkey lives in the Amazon rainforest, too. It can roar loudly. Animals are amazing! They can do great things!

The dolphin lives in the ocean. It can swim very fast. The octopus lives in the ocean, too. It can change its color. Animals are amazing! They can do great things!

3. Fill in the blanks using the information from the reading.
