Once the Lucayans died out after their encounter with Christopher Columbus and crew, The Bahamas was left uninhabited for almost 200 years. A group of Europeans later found refuge in The Bahamas in 1648. These individuals came from \_\_\_\_\_ and settled on an island in The Bahamas. These settlers named the island \_\_\_\_\_ which means \_\_\_\_\_. They are known as the \_\_\_\_\_ and were led by a man called \_\_\_\_\_. They came to The Bahamas for freedom to \_\_\_\_\_. After a disagreement with another Captain, Captain William Sayle and a few followers set sail heading north from Governor's Harbour, Eleuthera. Shortly after, Captain Sayle and his followers became \_\_\_\_\_ near Northern Eleuthera. They lost all their supplies and took shelter in a cave called \_\_\_\_\_. This is where they held their first worship service after the wreck.
