

addition

Count on and add with the help of your fingers.

Example:

$$4 + \text{2 fingers} = \boxed{6}$$

The diagram shows the number 4, followed by a plus sign, then a hand showing two fingers (representing 2). An arrow points from the 4 to the 5 on the hand, and another arrow points from the 5 to the 6. The result is a blue box containing the number 6.

$$2 + \text{1 finger} = \boxed{}$$

The diagram shows the number 2, followed by a plus sign, then a hand showing one finger (representing 1). An arrow points from the 2 to the 3 on the hand. The result is a pink box.

$$5 + \text{3 fingers} = \boxed{}$$

The diagram shows the number 5, followed by a plus sign, then a hand showing three fingers (representing 3). An arrow points from the 5 to the 6 on the hand, and another arrow points from the 6 to the 8. The result is a yellow box.

addition

Count on and add with the help of your fingers.

Example:

$$3 + \text{2} = \square$$

The number 3 is followed by a plus sign. To the right is a hand showing two fingers up. Above the fingers are the numbers 4 and 5, with arrows indicating a count from 3 to 4 and then to 5. To the right of the hand is an equals sign followed by a blue square box.

$$5 + \text{4} = \square$$

The number 5 is followed by a plus sign. To the right is a hand showing four fingers up. Above the fingers are the numbers 6, 7, 8, and 9, with arrows indicating a count from 5 to 6, 7, 8, and then 9. To the right of the hand is an equals sign followed by a pink square box.

$$4 + \text{3} = \square$$

The number 4 is followed by a plus sign. To the right is a hand showing three fingers up. Above the fingers are the numbers 5, 6, and 7, with arrows indicating a count from 4 to 5, 6, and then 7. To the right of the hand is an equals sign followed by a yellow square box.
