Weather

Weather is the state of the atmosphere at a particular place and time as regards to heat, cloudiness, dryness, sunshine, wind, rain, etc.

The weather can be:

1. **Sunny - The sky is clear. The sun shines brightly. The clouds are high up in the sky.**
2. **Cloudy - Clouds cover the sky. The sun does not shine brightly. It is hidden behind the clouds.**
3. **Windy - The wind blows and blows. The wind makes leaves and other objects move.**
4. **Rainy - It rains and rains. The sky is covered by rainclouds. The sun does not shine.**
5. **Stormy - It rains hard. The wind blows hard. Some objects are blown away by the wind. There are thunder and lightning.**
