

## Listening Comprehension Test for 11<sup>th</sup> Form Students

|             |              |
|-------------|--------------|
| <b>name</b> | <b>class</b> |
|-------------|--------------|

In this test you will listen carefully to a text read aloud twice. The text is followed by 10 true/false statements and 10 multiple-choice questions. You should do the first 10 tasks following the first reading of the text on the basis of what is stated or implied in the text. The text will be read a second time and you should do tasks 11 through 20 following the second reading of the text on the basis of what is stated or implied in the text. For each task you will choose from two symbols (+ or -) or four possible answers (A, B, C, or D), as specified prior to each task. Choose the best answer and circle the symbol or letter of your choice in the answer sheet.

**Statements 1 through 10 (choose + if the statement is true, - if it is false).**

|  |   |
|--|---|
|  | 1. The passage mentions four ways orchids attract insects to spread their flowers' pollen.  |
|  | 2. The title of the passage "The Orchid's Secret" refers to the hidden location of orchids. |
|  | 3. Orchid hunters Tom Hart Dyke and Paul Winder were held prisoner in the Philippines.      |
|  | 4. Orchids are able to self-pollinate.  |
|  | 5. According to the passage, male insects trick females to pollinate orchids                |
|  | 6. Orchids evolved to attract insects and birds for pollination.                            |
|  | 7. Different smells of orchids ensure their survival.                                       |
|  | 8. Five hunters returned from the Philippines in 1901 with 7,000 orchids                    |
|  | 9. Deaths from orchid hunting included attacks and disappearance.                           |
|  | 10. Orchids have more species than any other flower on the planet.                          |

Questions 11 through 20 (choose the correct letter A, B, C, or D).

**11. The author of this passage is primarily concerned with discussing**

- A. how orchids reproduce and create new species
- B. the nature of orchids and why they are beloved
- C. the impact orchids have on insects and birds
- D. the dangers of hunting orchids on humans and insects
