REDUCE, REUSE, RECYCLE

There are 3 ways to make the Earth a greener place: Reduce, reuse and recycle. When people reduce, it means they are using less of something. This means less waste. Turning off the water when we brush our teeth is a way of reducing. We don't waste water by doing this. Reusing is to use the things we already have again. We can use re-usable shopping bags made of cloth instead of plastic bags when we go to a supermarket. Using both sides of the paper is also a way of reusing.

Finally, we can recycle. Recycling is to create new materials from old ones. Materials like paper, plastic and metal can be recycled. You can recycle the things like newspapers, soda cans, plastic containers and magazines.

If we want to live in a green and clean world, we must take care of our world.

IV: Are the statements true or false? Write T or F.

1. We reduce water by turning off the water when we brush our teeth.
2. To create new materials from the old ones is called recycle.
3. We can recycle paper, plastic and metal.
4. When we go shopping, we must use baskets.
5. There are three ways to make the Earth greener: reduce, reuse and read.

Trip to New York

Next summer my family and me will visit New York. We are planning the trip and we will use lots of different means of transport.

From Portocolom to Palma we will go by car. My father will drive it and we will go to the harbour. There we are going to take a ship to Valencia. My sister lives in Valencia and she will join us. From Valencia to Madrid we will take the train and then we will be flying by plane about eight hours to get the big city New York.

In New York we will use the tourist bus to visit the city and we will do an excursion by helicopter to see the city from the sky... I'm so excited about it!

One night we will assist to the musical Lion King and after this we will take a taxi to go back to our hotel.

I'm sure it will be a great experience!

1. Read and tick the means of transport we will use in our trip.
