

10 Ways to Take Care of the Environment

hey there friends I have a very important mission to look after the 1) _____ and help so that kids like you join us in this task which is vital for our planet.

That's why I want to share with you these ten easy ways to look after the environment let's take a look.

turn off the lights and the electronic devices you're not using to save energy

replace 2) _____ bags with reusable cloth bags it takes plastic bags years to decompose and making them is a very contaminating process

separate and 3) _____ the different types of wastes organic inorganic containers 4) _____ or 5) _____ and cardboard

to avoid wasting water make sure taps are completely turned off

the toilet is not a 6) _____ bin did you know that we 7) _____ 10 liters of water every time we flushed the toilet

have a shower instead of a bath a five minute. Shower uses about 100 liters of water while a full bath would use up to 250 liters

turn off the water tap while brushing your teeth if you didn't shut off the faucet you would waste an average of 20 liters every time you brushed your teeth

reuse paper for example remember that you can write on both sides of the sheet to maximize its use

8) _____ up your litter every time you go to the beach or the mountains

respect and look after the animal's flowers and trees around you

easy ways to look after the environment right I'm sure you already know about them and do most of them
