L'area del Rombo

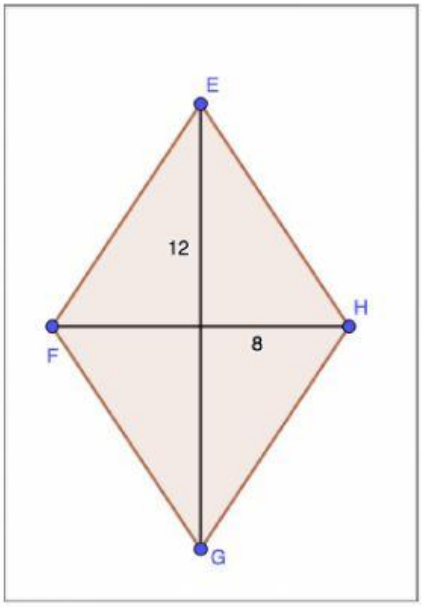

Per calcolare l'area del rombo si usa la formula:
Area = (D x d) : 2
dove D e d sono le due diagonali

Nel rombo in figura:
D = 6 cm
d = 4 cm

L'area sarà allora:

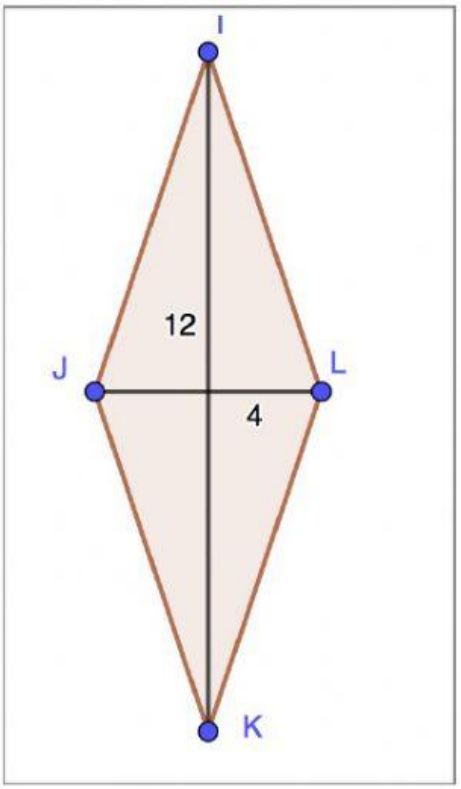

(6 x 4) : 2 = 12 cm^2

Ora calcola la misura dell'area di ciascun rombo
Le misure sono espresse in cm

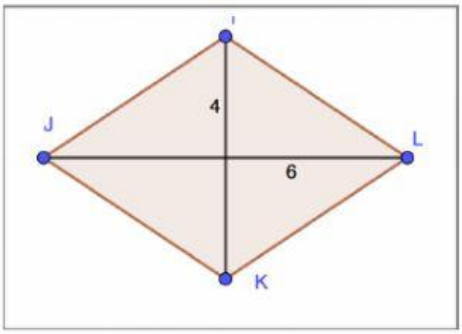

Area = _____ cm^2

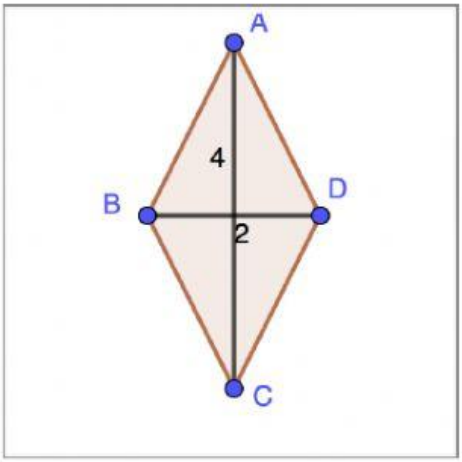

LIVEWORKSHEETS

Area = _____ cm²

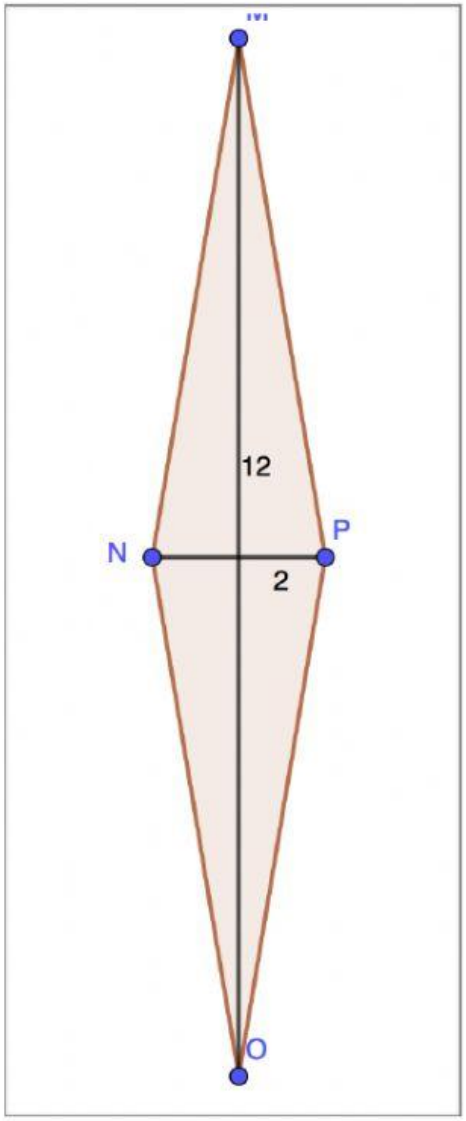

Area = _____ cm²

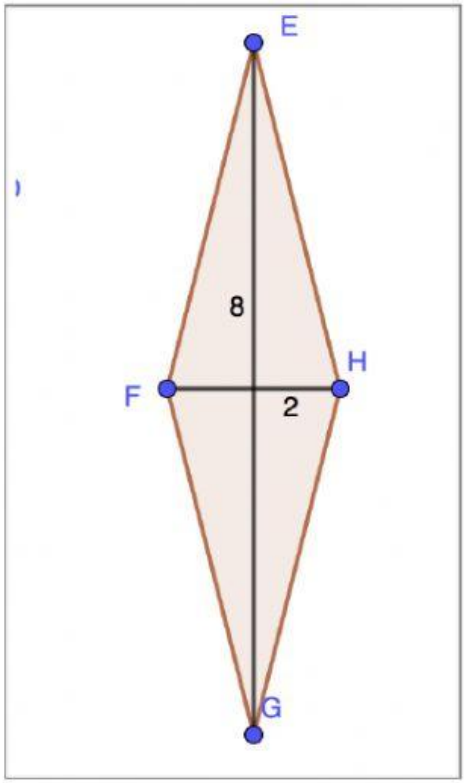

Area = _____ cm²

LIVEWORKSHEETS

Area = _____ cm^2

Area = _____ cm^2
