

## Noción de multiplicación como suma repetida

1. Completa siguiendo el ejemplo

$$3 + 3 = 6$$

2 cajas con 3 cilindros

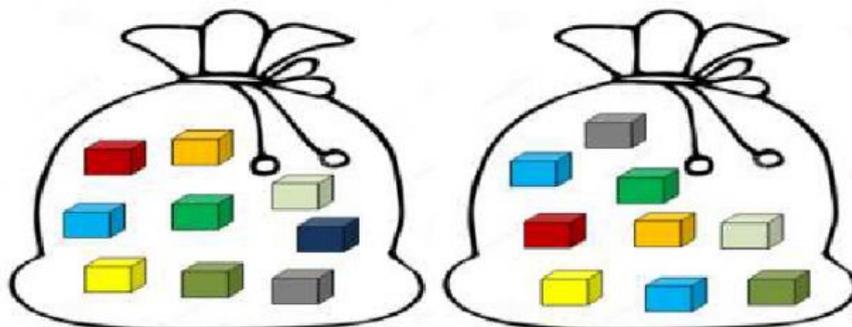

$$2 \times 3 = 6$$

$$\boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$\boxed{\phantom{00}}$  Comotas con  $\boxed{\phantom{00}}$  Estrellas

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

$$\boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

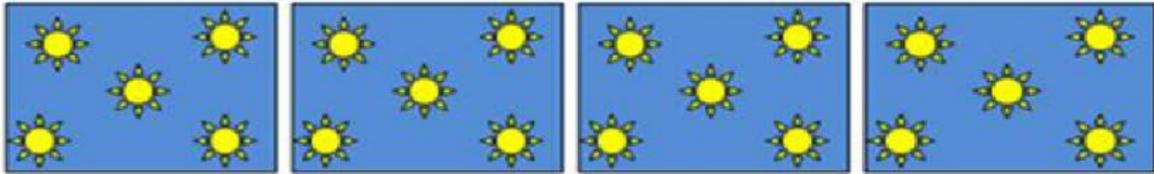

$\boxed{\phantom{00}}$  Bolsas con  $\boxed{\phantom{00}}$  Cubos

$$\boxed{\phantom{00}} \times \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

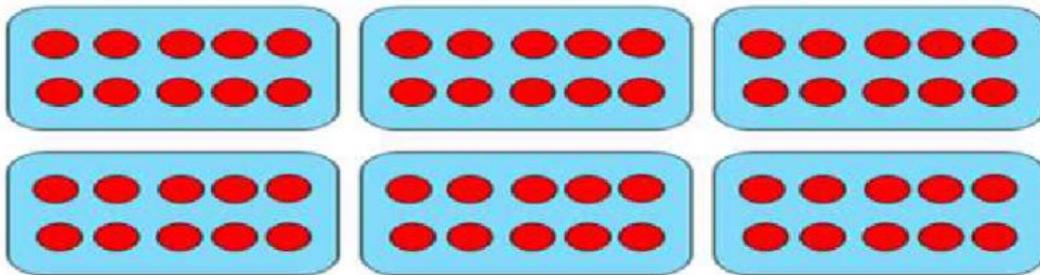

## 2. Cuenta y completa

$$\boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

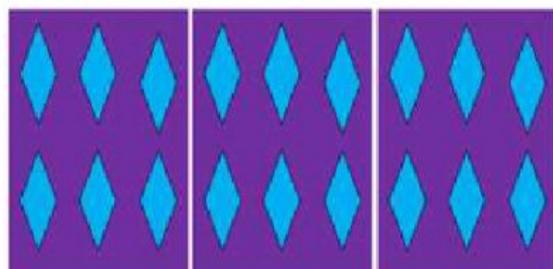

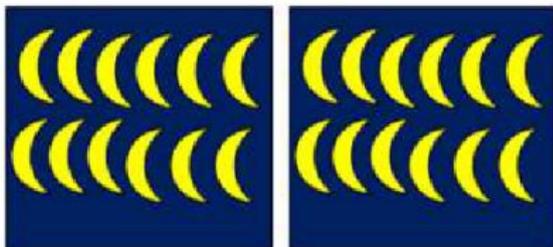

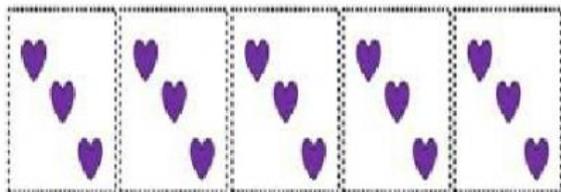

Veces  Son

$$\boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} + \boxed{\phantom{00}} = \boxed{\phantom{00}}$$

Veces  Son

## 3. Relaciona la imagen con la operación correspondiente.

$$6+6+6=18$$

$$3 \times 6=18$$

$$3+3+3+3+3=15$$

$$5 \times 3=15$$

$$12+12=24$$

$$2 \times 12=24$$

4. Escribe en cada tarjeta de colores la operación como multiplicación o como sumas según corresponda cada ejercicio, observa el **Ejemplo.**

$$2+2+2+2+2+2=14$$

$$7 \times 2 = 14$$

$$3 \times 5 = 15$$

$$10+10+10=$$

$$8+8+8+8+8=$$
