Exercise 6:

Learn new words:

Tricky insects

See that leaf moving in the wind? Look again. It is an insect. It just looks like a ***leaf***! Hungry birds do not know it is a bug. They do not try to eat it.

Some butterflies look like dried ***leaves***. They ***rest*** with their wings together to ***match*** the real leaves around them. The colorful parts of their ***wings*** are hidden until they ***fly away***.

Another bug that wears a costume is the stick insect. It looks like its name—a stick! This insect ***hide***s in the leaves and ***twigs*** of a tree. It can turn green or brown to match the colors around it. Some stick insects are ***tiny***. Others are a foot long. Insects are very ***clever***. Maybe the next time you take a walk, you will see one ***pretend***ing to be something else.

Read and answer these following questions:
