

Comparación de dos fracciones

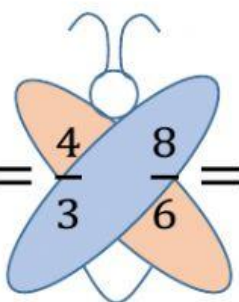

Así se hace:

$$\frac{21}{15} = \frac{7 \cdot 3}{5 \cdot 3} = \frac{7}{5} > \frac{2}{3} = \frac{5 \cdot 2}{5 \cdot 3} = \frac{10}{15}$$

Ahora hazlo tú:

$$\frac{2}{3} \frac{7}{9}$$

$$\frac{5}{8} \frac{3}{4}$$

$$\frac{4}{3} \frac{8}{6}$$

$$\frac{5}{4} \frac{6}{7}$$
