Grade 11 **Unit 3** **Lesson 3.6** **HS** **Worksheet**

Are the following statements about the nervous system true or false?

	True	False
The brain and the spinal cord are part of the central nervous system.		
The nervous system controls the body's actions.		
The nervous system contains the bones and muscles.		
The peripheral nervous system is part of the nervous system.		
The nervous system circulates blood around the body.		
The nervous system sends signals to and from parts of the body.		

Read each of the steps below which are describing the reflex when you touch something hot. Put the steps in the correct order.

- Muscles of the arm and hand contract to move the hand away.
- Skin receptors detect a change in temperature.
- The brain sends signals to the motor neurones to tell the muscles how to react.
- The sensory neurones send signals to the brain about the change in temperature.
