The world is facing very serious environmental problems due to climate change. Some people think that it would be impossible to live in the countries in the Middle East after 1. \_\_\_\_\_ years because of extreme heat. In many countries like Jordan, there is only \_\_\_\_\_ underground water left as the lakes and rivers are drying up fast. Extreme heat is also very bad for animals. The rivers and lakes are home to 3. \_\_\_\_\_ animals and when they dry up, they would die too. Many countries like China and India produce 4. \_\_\_\_\_ pollution from their power stations and factories. 5. \_\_\_\_\_ these countries have more than one billion people, so it is not easy for them to control pollution.
