

1.- Look at the picture, drag and drop the parts of the skin in the correct place

Dermis - Hypodermis - Epidermis

2.- Match the skin layers with their function

Dermis

It is made up of skin cells. Every 4 weeks the cells die and are replaced them by new cells

Hypodermis

It contains hair follicles, sweat glands and nerve endings

Epidermis

It stores fat.
The fat protects our bones and organs
