

NATURAL SCIENCE - UNIT 2 REVISION WORKSHEET

"The classification of living things"

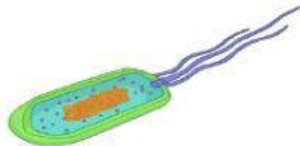

1. COMPLETE (WRITE) THE TEXT USING THE WORDS BELOW (the options can be used more than once)

DIVIDING – BY PRODUCING SPORES - MULTICELLULAR – UNICELLULAR – SPORES -

- a) Monera are _____ organisms. They reproduce by _____.
- b) Most fungi are _____, but some are _____. They reproduce by producing _____.
- c) Protists can be _____ or _____. They reproduce in two ways; some _____ but others _____.

2. WRITE THE NAME OF THE KINGDOM IN EACH PICTURE: FUNGI, MONERA, PROTOCTISTA

3. Drag the definition to the correct word

Organisms that absorb nutrients from plants/animals.

Organisms that make their own food.

A plant of a large group that comprises those that have flowers and produce seeds.

A plant of a large group that comprises those that the seeds grow inside the cones.

- a) Autotroph: _____
- b) Angiosperms: _____
- c) Heterotrophs: _____
- d) Gymnosperms: _____

4. Write angiosperm or gymnosperms, think: do they have fruit or flower or they have pines or nuts?

5. Choose the correct option

Some plants don't produce seeds, they produce

- a) sponges b) spores

The seeds inside pine cones are called

- a) nuts b) spines

What type of animal has a spinal column?

- a) Vertebrate b) Invertebrate

What kingdom do sea sponges belong to?

- a) Annelids b) Porifera

These invertebrates have an exoskeleton

- a) Molluscs b) Arthropods

Which belong to the vertebrate group?

- a) Worms, birds and fish b) Amphibians, birds and fish

What do snakes have on their body?

- a) Scales b) Shell

How do fish, birds and amphibians reproduce?

- a) Viviparous b) Oviparous

What kind of skin do amphibians have?

- a) covered with scales b) thin and smooth

Fish have a long body that is covered with

- a) covered with scales b) thin and smooth

Mammals have the body covered by

- a) feathers b) fur

The two main types of seed plant are angiosperms and

- a) flowering plants b) gymnosperms

Oviparous animals

- a) lay eggs b) are born as live young individuals

Penguins belong to the _____ kingdom

- a) mammals b) birds

Worms belong to the _____ kingdom

- a) annelids b) cnidarians

Jellyfishes belong to the _____ kingdom

- a) molluscs b) cnidarians

Mussels belong to the _____ kingdom

- a) porifera b) molluscs

Spiders belong to the _____ kingdom

- a) porifera b) arthropods

Octopuses belong to the _____ kingdom

- a) annelids b) molluscs

Crocodiles belong to the _____ kingdom

- a) amphibians b) reptiles

Turtles belong to the _____ kingdom

- a) reptiles b) amphibians

Mosquitos belong to the _____ kingdom

- a) annelids b) arthropods

Frogs belong to the _____ kingdom

- a) amphibians b) reptiles

Lions belong to the _____ kingdom

- a) amphibians b) mammals

Whales belong to the _____ kingdom

- a) fish b) mammals
