

Write in the missing coin to complete the addition statement. The possibilities for each question are listed.

a) $5\text{¢} + 1\text{¢} + \text{¢} = 7\text{¢}$	b) $1\text{¢} + 1\text{¢} + \text{¢} = 12\text{¢}$	c) $5\text{¢} + 5\text{¢} + \text{¢} = 11\text{¢}$
d) $10\text{¢} + 5\text{¢} + \text{¢} = 16\text{¢}$	e) $5\text{¢} + 5\text{¢} + \text{¢} = 20\text{¢}$	f) $10\text{¢} + 10\text{¢} + \text{¢} = 30\text{¢}$
g) $25\text{¢} + 10\text{¢} + \text{¢} = 45\text{¢}$	h) $25\text{¢} + 10\text{¢} + \text{¢} = 40\text{¢}$	i) $10\text{¢} + 5\text{¢} + \text{¢} = 40\text{¢}$

Draw the additional **coins** needed to make each total.

a) $25\text{¢} + \text{¢} + \text{¢} = 35\text{¢}$	b) $10\text{¢} + \text{¢} + \text{¢} + \text{¢} = 50\text{¢}$
c) $25\text{¢} + 25\text{¢} + \text{¢} + \text{¢} = 70\text{¢}$	d) $25\text{¢} + 5\text{¢} + \text{¢} = 35\text{¢}$
e) $10\text{¢} + 10\text{¢} + \text{¢} + \text{¢} = 35\text{¢}$	f) $25\text{¢} + 25\text{¢} + \text{¢} = 75\text{¢}$

Draw the additional coins needed to make each total. You can only use **two** coins for each question, either (i) a penny and a nickel, (ii) a penny and a dime, or (iii) a nickel and a dime.

a) 16¢	10¢	¢	¢	
b) 17¢	10¢	1¢	¢	¢
c) 30¢	10¢	5¢	¢	¢
d) 50¢	25¢	10¢	¢	¢
e) 26¢	10¢	1¢	¢	¢
f) 61¢	25¢	25¢	¢	¢

Draw a picture to show the **extra coins** each child will need to pay for the item they want:

- a) Kevin has 25¢. He wants to buy a pen for 35¢.

$$25¢ + \text{¢} \text{ ¢} = 35¢$$

- b) Sandra has 1 quarter and 2 dimes. She wants to buy a notebook for 70¢.

$$\begin{array}{c} 25¢ \\ 10¢ \end{array} + \text{¢} = 70¢$$

10¢

- c) Laura has 2 quarters, 1 dime and 1 nickel. She wants to buy a snack for 87¢.

$$\begin{array}{cc} 25¢ & 25¢ \\ 10¢ & 5¢ \end{array} + \begin{array}{cc} ¢ & ¢ \\ ¢ & ¢ \end{array} = 87¢$$
