

Read the text about the Arabian Wolves and choose the correct answers:

Arabian wolves

Most people are very scared of wolves. In the Middle East **wolves** might die, like in many other parts of the world. Scientists think there are only between 1000 and 2000 wolves left in countries like Iraq, Iran, Syria, Lebanon, Yemen, Oman and Saudi Arabia which is different from before. Sometime before the 1970s, the Arabia wolf lived along the sandy dunes of the United Arab Emirates, but not now. It ate birds, insects, sheep and goats. People killed wolves to keep their **sheep** and goats safe. Some scientists want to bring wolves back to the UAE. 'We have too many animals in the desert, but nothing kills them,' said Dr. Azzam, one of the scientists. 'This means that there isn't enough food for all the animals. If wolves live in the desert, they'll keep the animal numbers **low**. Then there will be **enough** food for all the animals.' Some people do not want wolves to live in the desert again. 'If the wolves live here, they'll kill my goats,'
