

Read the text about the camels and choose the correct answers:

Camels

Camels live in the deserts of Africa, Asia and Australia. **They** carry people and things across the desert. Before travelling across the desert, a camel eats a lot of food and drinks a lot of water. The food is stored as fat in the hump on the camel's back. As the camel crosses the desert, **it** uses the fat in its hump as food and water. A camel can live for a week or more without drinking water! At the beginning of the trip, the camel's hump is big and fat. At the end of the trip, its hump is much smaller.

1. What do the camels do before the trip?
 - a) They sleep a lot
 - b) They drink and eat a lot
 - c) They walk for a long distance.

2. How long can the camel live without drinking water?
 - a) seven days
 - b) three days
 - c) thirty days

3. Why does the camel's hump become smaller at the end of the trip?
 - a) to store the food and the water
 - b) because it uses the fat in the hump during the trip.
 - c) It is in diet

4. What can the camel carry?
 - a) It can carry things and people
 - b) It can carry only people.
 - c) It carries just things.
