SEQUENCE CONNECTORS ACTIVITIES

1. Order the following steps to make a kite. Numerate from 1 to 6 to organize the sequence.

- ☐ Next, attach your flying line to the bridle.
- ☐ Finally, make a tail.
- ☐ First of all draw your kite sail.
- ☐ As soon as you finish the kite frame, attach it to the sail and make the bridle.
- ☐ After that, make the kite frame using two wooden sticks.
- ☐ Then cut out the kite sail.

2. Think how to make a robotic hand and match the connector to the action.

To get started	cut the hand and handle.
Then	check it.
After that,	glue the straws.
Next	draw your hand and handle.
At this point	insert the strings through the straws and make loop knots in the end.
Last but not least	cut the straws.
