Reading

What is social media?

According to the balance small business, social media refers to websites and applications that are designed to allow people to share[3] quickly[1], efficiently[2], and[3] in real-time. The ability to photos, opinions, events, etc. in real-time has transformed the way we live.

Different types of social media

Facebook:

This social media allows people to share videos, photos and documents to different "Friends" or "groups". Also, people can post some status or opinions in their profiles and their friends can react to them with an emoji.

Tumblr:

In this social media, people can share different[4] type of information with other people. They[5] can write a recipe or[6] they can also write about[7] a travelling experience. In every blog, people include images drawings or videos next to[8] their written entry.

Tik Tok:

The main[9] function of this social media is to create[1] different types videos[2]. You[10] can edit the video by using some filters music[3] and recordings with your smartphone. Then, you can post it and share it with your friends or people in general. You can comment the videos.
