

MY ENDANGERED ANIMAL IS...

NUMBER:	35 left in the wild.
HABITAT:	Mixed forests.
WHERE DO THEY LIVE?	In a tiny area that connects China and Russia.
WHY ARE THEY IN DANGER? (THREAD)	<ul style="list-style-type: none"> • Because they are killed for fur coats and hats. • For medicine. • Because of wild fires. • Because of poaching.
WHAT CAN WE DO?	Fire-fighting Anti-poaching
AMAZING FACT:	Amur leopards are nocturnal so sleep during the day in cool caves
