a Recycling Glass Bottles b Waste Paper Problems c Using Trash in New Ways

WEARABLE TRASH

Lots of things can be recycled—glass, paper, metal, and plastic. Rethink Fabrics is a company based in Las Vegas, the United States. It's trying to fight the planet's plastic waste problem, one bottle at a time.

The company's goal is to encourage people to think about where their clothes come from by making clothing from trash. It uses new technology to make clothing like T-shirts.

Rethink Fabrics' T-shirts are high quality and not very expensive. They are made from recycled plastic bottles. Each T-shirt shows the number of plastic bottles used to make it, so customers know they are helping the planet.

At the end of the T-shirt's life, the recycling process continues. The company can make an old T-shirt into another new piece of clothing. Other companies recycle plastic waste into shoes, and even outdoor items like park benches. Look around and discover new ways to recycle. Your plastic really can help to save the environment!

B **EXAM PRACTICE** **Complete the summary.** Use the words in the box.

expensive	T-shirts	plastic bottles	recycles	help	environment

Do you think about how you can save the [1] _____? Rethink Fabrics is trying to [2] _____ the planet. The company makes [3] _____ from [4] _____. The clothes are high quality but not [5] _____. When the T-shirts are old, Rethink Fabrics [6] _____ them to make T-shirts again.
