

Identidades trigonométricas

1) Utiliza las identidades trigonométricas para demostrar la igualdad

$$\tan \alpha + \cot \alpha = \sec \alpha \cdot \csc \alpha$$

$$\frac{\boxed{}}{\boxed{}} + \frac{\boxed{}}{\boxed{}} = \sec \alpha \cdot \csc \alpha$$
$$\frac{\boxed{}}{\boxed{}} + \frac{\boxed{}}{\boxed{}} = \sec \alpha \cdot \csc \alpha$$
$$\frac{\boxed{} \cdot \boxed{}}{1} = \sec \alpha \cdot \csc \alpha$$
$$\frac{\boxed{}}{1} \cdot \frac{\boxed{}}{1} = \sec \alpha \cdot \csc \alpha$$
$$\boxed{} \cdot \boxed{} = \sec \alpha \cdot \csc \alpha$$

2

$$\cot^2 \alpha = \cos^2 \alpha + (\cot \alpha \cdot \cos \alpha)^2$$

$$\cot^2 \alpha = \boxed{} + \boxed{} \cdot \boxed{}$$

$$\cot^2 \alpha = \boxed{} \cdot (1 + \boxed{})$$

$$\cot^2 \alpha = \boxed{} \cdot \boxed{}$$

$$\cot^2 \alpha = \boxed{} \cdot \frac{1}{\boxed{}}$$

$$\cot^2 \alpha = \boxed{}$$

l.q.q.d.

3

$$\frac{1}{\sec^2 \alpha} = \sin^2 \alpha \cdot \cos^2 \alpha + \cos^4 \alpha$$

$$\frac{1}{\sec^2 \alpha} = \boxed{} \cdot (\boxed{} + \boxed{})$$

$$\frac{1}{\sec^2 \alpha} = \boxed{}$$

$$\frac{1}{\sec^2 \alpha} = \frac{1}{\boxed{}}$$

l.q.q.d.

4

$$\sec^2 \alpha + \csc^2 \alpha = \frac{1}{\sin^2 \alpha \cdot \cos^2 \alpha}$$

$$\frac{1}{\boxed{}} + \frac{1}{\boxed{}} = \frac{1}{\sin^2 \alpha \cdot \cos^2 \alpha}$$

$$\frac{\boxed{} + \boxed{}}{\boxed{} \cdot \boxed{}} = \frac{1}{\sin^2 \alpha \cdot \cos^2 \alpha}$$

$$\frac{1}{\boxed{} + \boxed{}} = \frac{1}{\sin^2 \alpha \cdot \cos^2 \alpha}$$
