

➤ Une cada figura con su perímetro correspondiente.

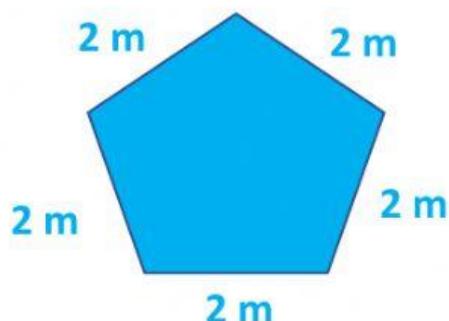

20 cm

14 cm

10 cm

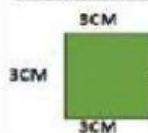

9 cm

PERÍMETRO

“Es la suma de los lados de una figura geométrica, es la medida de su contorno”.

CUADRADO

$$P = L + L + L + L$$

$$P = 3\text{cm} + 3\text{cm} + 3\text{cm} + 3\text{cm}$$

$$P = 12\text{cm}$$

RECTÁNGULO

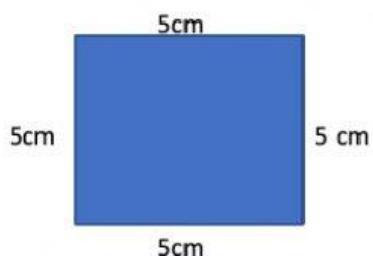

$$P = 7\text{cm} + 20\text{cm} + 7\text{cm} + 20\text{cm}$$

$$P = 54\text{cm}$$

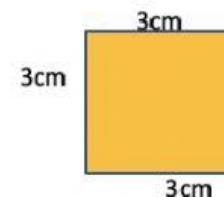

- Calcula el perímetro de cada cuadrado:

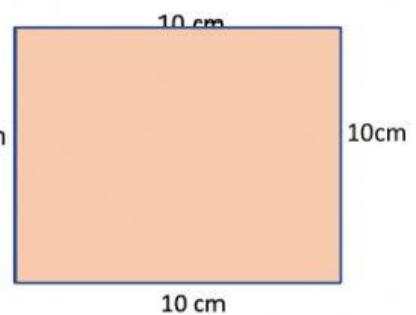

$$P = \boxed{\quad} + \boxed{\quad} + \boxed{\quad} + \boxed{\quad}$$

$$P = \boxed{\quad}$$

$$P = \boxed{\quad} + \boxed{\quad} + \boxed{\quad} + \boxed{\quad}$$

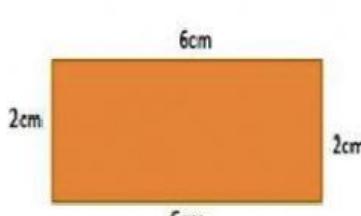

$$P = \boxed{\quad}$$

$$P = \boxed{\quad} + \boxed{\quad} + \boxed{\quad} + \boxed{\quad}$$

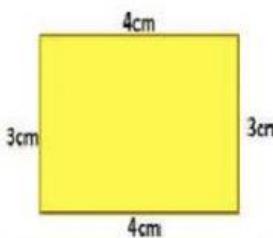

$$P = \boxed{\quad}$$

- Calcula el perímetro de cada rectángulo:

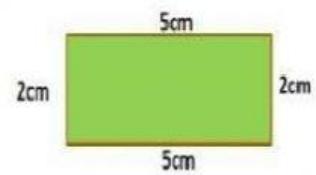

$$P = \boxed{\quad} + \boxed{\quad} + \boxed{\quad} + \boxed{\quad}$$

$$P = \boxed{\quad}$$

$$P = \boxed{\quad} + \boxed{\quad} + \boxed{\quad} + \boxed{\quad}$$

$$P = \boxed{\quad}$$

$$P = \boxed{\quad} + \boxed{\quad} + \boxed{\quad} + \boxed{\quad}$$

$$P = \boxed{\quad}$$

Desafío

Resuelve el siguiente problema:

1 Una parcela tiene forma de triángulo, y sus lados miden 9 m, 11 m y 12 m. Calcula cuantos metros de valla hacen falta para cercarla.

Solución: Hacen falta **metros.**
